

REMARKS***Summary of the Amendment***

Upon entry of the above amendment, a Substitute Specification will have been entered to ensure the record is correct.

Request for Entry of Substitute Specification

As noted in the Amendment Under 37 C.F.R. 1.116 of March 6, 2007, Appellants noted, in reviewing the Official File on the U.S. Patent and Trademark Office PAIR system and the published U.S. Application, amendments to the specification were not correctly entered, rendering Appellants' specification incorrect. In this regard, while it appears the paragraph numbers identified in Appellants' preliminary amendment were incorrect, these amendments were properly entered by the U.S. Patent and Trademark Office personnel. However, it also appears the non-amended paragraphs were inadvertently deleted from the specification.

Accordingly, to ensure that the record is correct, Appellants are concurrently submitting a request to enter a Substitute Specification that includes the changes made during the prosecution of the instant application. Further, in accordance with the Examiner's request, Appellants are concurrently submitting a marked-up copy of the Substitute Specification.

Further, as this instant amendment merely corrects the specification for the official record, no further consideration or search is required on the Examiner's behalf. Accordingly, entry and consideration of the Substitute Specification is hereby requested to ensure that the record for the pending Appeal is clear.

Application is Allowable

Thus, Applicants respectfully submit that each and every pending claim of the present invention meets the requirements for patentability under 35 U.S.C. §§ 102 and 103, and

respectfully request the Examiner to indicate allowance of each and every pending claim of the present invention.

Authorization to Charge Deposit Account

The undersigned authorizes the charging of any necessary fees, including any extensions of time fees required to place the application in condition for allowance by Examiner's Amendment, to Deposit Account No. 19 - 0089 in order to maintain pendency of this application.

CONCLUSION

In view of the foregoing, entry and consideration of the attached Substitute Specification is requested.

Respectfully submitted,
Alain FOUERE et al
